

April 2016

Welcome to the SwiftStack Monthly Newsletter!

Hi Colleague,

We normally like our newsletter to appear in your inbox mid-month, but April has been our most active month ever. From Bio-IT World, NAB, AIRI IT, partner and customer announcements, the OpenStack Summit as well as the launch of SwiftStack 4.0 this week, this newsletter is worth the wait. Get to know what's new in V4.0, and let us know what you think; each of these new capabilities were customer-inspired, and we are working on 5.0 starting now!

Respectfully,

Mario Blandini, VP of Marketing

Product Update

Coming over the next 90 days...SwiftStack 4.0! Learn all about the enhanced integrated load balancer, metadata search capabilities, and SwiftStack Drive.

- [Introducing SwiftStack 4.0 Article](#)
- Erik Pounds and Joe Arnold [highlight what's new](#) in SwiftStack 4.0 (4:55)
- [SwiftStack 4.0 Webinar replay](#) with Mario Blandini and Joe Arnold (30:38)

We also unveiled our product plan for the remainder of 2016:

- [SwiftStack's 2016 Plan Article](#)
- Joe and John [talk about the new file access capabilities](#), ProxyFS, in the vBrownBag at OpenStack Summit Austin (7:44)
- They [continue the conversation](#) by double-clicking down into many of the architectural details of ProxyFS (22:08)

Customers & Other Videos

Learn how Oklahoma Medical Research Foundation (OMRF) leverages SwiftStack

- [Video \(3:40\)](#)
- [Case Study](#)

At Bio-IT World, Dirk Peterson, from Fred Hutch, and Joe Arnold [presented Object Storage at Petabyte Scale](#) (19:43)

Following their talk, they [continued the conversation in the hallway](#) to highlight the performance advantages of scale-out object storage (1:32)

[\[Webinar\] Like an OpenStack public cloud, but behind your firewall](#)

In this webcast, Metacloud Technical Product Manager Jeremy Hopkins of Cisco Systems talks with SwiftStack to analyze the latest private cloud options available to organizations, and how the right technologies can deliver the benefits of cloud to organizations that also require full custody and control on-premises.

Other Interesting Blog Posts

SwiftStack was at Bio-IT World recently, and we had a great time interacting with the crowd and talking about the ways we can help store and manage data in the Life Sciences industry. If you missed us there and would like to catch up on all the happenings, [check out all the highlights](#).
