

March 2018

Welcome to the SwiftStack Monthly Newsletter!

Hello,

Did you know that we are a **Cisco Preferred Solution Partner**? To showcase our joint solution, we will be exhibiting in the Cisco booth at the **NAB show** next month! If you will be in Las Vegas, please take this opportunity to **meet with us** and check out our demo of a multi-cloud media workflow. If you're still looking for a reason to attend and you're a Cisco or SwiftStack customer/partner, **secure your discounted ticket** to the expo hall. We're looking forward to seeing you in Las Vegas!

Respectfully,

The SwiftStack Team

Product

New End-to-End Solutions Using SwiftStack

We have added three new solutions that leverage SwiftStack's Multi-Cloud Data Management:

Analytics

Secure your data and maximize its business value by keeping all tiers of storage active and available.

Surveillance

Dramatically increase your retention times by using multi-region, scale-out storage for your surveillance data.

Medical Imaging

Keep pace with explosive data growth by leveraging cloud-native, scale-out storage for health care providers.

SwiftStack Cloud Migrations

New to SwiftStack 6.4 is Cloud Migration! This functionality can pull data from any S3 or Swift API target to your SwiftStack cluster. It uses the full-bandwidth of all available nodes to move the data. This feature facilitates live migration of applications or provides File Access to migrated S3 data. Check out the new demo video!

Industry Update

Industry Watch: Managing data across multiple clouds

By David Rubinstein

"Microservices and containers have created a world of interoperable cloud-based services that can be moved seamlessly from one platform to another with minimal change. An area that has lagged, however, is providing data that can be used across multiple cloud platforms to power today's modern applications."

Multicloud storage mitigates risk of public cloud lock-in

By Jeff Kato and Jeff Byrne

"SwiftStack offers multicloud object storage services and provides a data control plane across the clouds."
