Welcome to the SwiftStack Monthly Newsletter!

Hello {{lead.First Name:default=edit me}},

We start this month's newsletter with a major announcement: [Pankaj Patel, former Chief Development Officer at Cisco, has joined SwiftStack's Board of Directors](#). Everyone at SwiftStack is extremely excited about this news, and the strategic guidance Pankaj will bring to the company and to the Cisco/SwiftStack partnership.

Welcome, Pankaj!

Respectfully,

Mario Blandini, VP of Marketing

Product

Product Update

Since last month's newsletter, SwiftStack 5.1 and 5.2 have been released and include new Cloud Sync capabilities.

First, you can now one-way synchronize containers/buckets between SwiftStack clusters, allowing data to automatically be shared across clusters or to ease data migration operations.

Also, you can now set up cloud-to-cloud sync mappings at the account level instead of just the container/bucket level. This is helpful when many containers/buckets need to be synchronizes with Google Cloud Storage or Amazon S3.

Customers

This doctoral research university replaced their existing tape based solution with SwiftStack and Commvault. They can now analyze, backup and recover, archive, and search data across their storage platform.

At SwiftStack, we are driven by the needs of our client base, and we proudly welcome Liberty University as a customer.

Ann Arbor Leadership Training Summary

By John Dickinson, Director of Technology at SwiftStack and Swift PTL

Last week I was privileged to attend the ZingTrain leadership training class sponsored by the OpenStack Foundation. There were two days of formal training and a third unstructured day for the group to discuss how the lessons apply in the OpenStack community. ZingTrain is one of the many businesses in the Zingermans Community of...

Demo of an Example Media Workflow

By Chris Nelson, Director, Systems Engineering at SwiftStack

Right now, at NAB 2017, we're demonstrating an example media workflow in the Cisco booth using SwiftStack software and Cisco UCS servers. For those who are unable to make it to the show and are interested in seeing the demo, check out this video we produced that highlights some of the ways SwiftStack private and hybrid...
