

NEWSLETTER

July 2016

Welcome to the SwiftStack Monthly Newsletter!

Hello!,

As we hinted in the last newsletter, there's a brand new [swiftstack.com](#). While many of you know who we are, one cool new feature is our Customers page. It gives you an insight into how some of our customers are putting SwiftStack Object Storage to use.

Respectfully,

Mario Blandini
Chief Evangelist
SwiftStack, Inc.

PRODUCT UPDATE

Encryption of Data at Rest

The OpenStack Swift community has been hard at work adding encryption at rest capabilities to Swift clusters and the first major effort has been completed. Now, our team is integrating that capability into SwiftStack, which will be available to you shortly. [Learn how it works!](#)

CUSTOMERS

Cisco Collaboration

To date, many of our successful customers are using Cisco UCS servers and SwiftStack software to create private storage clouds. A few weeks back, at Cisco Live, we announced that we're collaborating on new solutions with Cisco Metapod, which are [available directly from Cisco](#).

EVENTS
