

NEWSLETTER

MADE IN SAN FRANCISCO

SEPTEMBER 2016

Welcome to the SwiftStack Monthly Newsletter!

Hi Colleague,

As you may have seen, we made a few announcements since the last newsletter, with more info below. Especially exciting to us this month are our new solutions and partnerships in the Media Production area. This includes a new SwiftStack team member, Scott Adametz. We can now say we are not “just the Hair Club president”, former success as customer at Pac-12 Networks makes Scott the ideal architect and evangelist as a larger number of Media Creators grow and evolve their data-centric workflows.

Respectfully,

Mario Blandini, VP of Marketing

PRODUCT UPDATE

DEMO SERIES

Load Balancer Demo Video

We just released a new video in our [SwiftStack Demo Series](#) which shows you the [Integrated Load Balancer](#). Watch Chief Product Officer Joe Arnold demonstrate how it works for demanding scale-out environments, reducing the need for expensive hardware-based load balancers.

PARTNER UPDATE

Vizrt Viz One

We've just announced a private cloud storage solution for [Viz One](#) that will enable a higher usage of media assets. This integrated solution was on display at the IBC 2016 event that just ended this month. The SwiftStack storage solution for Viz One is provided by Vizrt on pre-configured servers with standard and high-density server options.
