

NEWSLETTER

MADE IN SAN FRANCISCO

OCTOBER 2016

Welcome to the SwiftStack Monthly Newsletter!

Hi Colleague,

For those who follow SwiftStack, you know we are different in several ways. Pay-as-you-grow, no lock in, software-only are just a few. As a team of ~60 folks working to delight customers and help them succeed with their applications, we have always felt our vision for storage and extracting the maximum value from data was different in a good way. In addition to new capabilities, customer successes, and blogs that we include in our newsletter each month, we are especially proud that industry analyst Gartner has this month recognized that the things that make us different also make us "visionary".

Respectfully,

Mario Blandini, VP of Marketing

PRODUCT UPDATE

Cloud Sync Demo Video

Joe Arnold and Timur Alperovich demonstrate Cloud Sync. With this new SwiftStack functionality, you can replicate data to Amazon S3 public cloud storage for offsite protection and sharing purposes.
