FEBRUARY 2017

## Welcome to the SwiftStack Monthly Newsletter!

Hi Colleague,

In the time between the AWS re:Invent show last November and the Google Cloud Next conference next week, we have seen a lot of interest in hybrid cloud solutions here at SwiftStack. Building on a great solution for on-premises scale-out storage, and extending that value in a single namespace to include capacity in public cloud buckets, opens up additional use cases. I hope you can make one of our upcoming webcasts in your area of interest.

Respectfully,

Mario Blandini, VP of Marketing

## Product

### First look at the next version of SwiftStack

Interested in getting a first look at the next major version of SwiftStack? If so, sign up for our upcoming webinar which will take place Monday at 10am PST.
