October 2018

## Welcome to the SwiftStack Monthly Newsletter!

Hello,

We're exhibiting right now at Splunk .conf18 and we've just shared some big news! Please read further for our exciting updates!

Respectfully,

The SwiftStack Team

## Partner Update

### Splunk and SwiftStack Press Release

We're excited to [share news](#) that SwiftStack is now fully compatible with Splunk Enterprise! Splunk's new SmartStore feature separates Splunk compute and storage, reducing costs and complexity without impacting search performance. SwiftStack can serve as the Splunk storage tier and will commonly hold 80% - 90% of all Splunk data. For more info see the [SwiftStack for Splunk Enterprise solutions page](#).

For an existing SwiftStack user, it's as easy as creating a container and pointing Splunk Enterprise to it!

## Blog

### Building a Storage Foundation for the Next Wave of Splunk Data Growth

SwiftStack's largest customers, spanning many industries, use our storage technology in a highly similar fashion. They have applications and devices that generate reams of data which lands on SwiftStack and is run through multiple sets of analyses to produce a meaningful business result. Pharmaceutical companies use SwiftStack to create more potent compounds. Manufacturers use SwiftStack to hone machine learning algorithms. Financial services firms use SwiftStack to identify low-risk borrowers. And, so on...
